- * Power Requirement:
220 V Single-Phase 50/60 Hz
- * Sewing Machine Motor:
XCG 554 20Y - 550 W
- * Control Box: XCG MFY 2005
- * Air Consumption: 3 L/min

Equipped with a super fast sewing head (6500 rpm) specifically made in Japan by Yamato and with the original Vi.Be.Mac. puller system, which results in an incredible improvement in the quality of the finished garment with the 2 quarters of material perfectly coupled, no twisted effect on the legs! The puller system avoids the need of a skilled operator, who should be (in case of standard unit) pulling the quarter pieces of trousers in order to match perfectly the two parts. The ergonomic stand is adjustable in height and bends on itself to allow easy maintenance and cleaning operations.
